

Wash-Trading Estimates on Unregulated Exchanges, Three Independent Studies (Fig. 16)

All three estimates describe UNREGULATED exchanges only. Since Jan. 2024, U.S. spot Bitcoin ETF approval and MiCA implementation have shifted a substantial share of institutional PRICE-FORMATION volume onto regulated venues (CME futures, NYDFS/CFTC/SEC-supervised spot exchanges) not characterized by any of these three studies; none of the bars above should be read as describing the market's regulated tier.
