

Tether (USDT) Share of Stablecoin Market Cap (Fig. 17)
(range 58.3-63%, late 2025-2026)

Shown as a range across independent trackers (CoinMarketCap, DeFiLlama-based aggregators) rather than a single archived figure, since USDT's exact share moves within this band across late 2025 and 2026. The U.S. GENIUS Act (enacted July 2025) establishes forward-looking federal reserve/redemption standards for payment stablecoin issuers but does not retroactively resolve concentration risk in Tether's existing market share.
