

Macroeconomic Impact of Bitcoin Legal-Tender Adoption in El Salvador (Fig. 18)

REPRODUCED FROM CITED SOURCE: Charfi (2024), difference-in-differences estimates comparing El Salvador against a control group of neighboring countries after Bitcoin's 2021 legal-tender adoption. Higher inflation and bond yields plus lower employment and investment accompanied the policy; remittance inflows rose modestly despite the policy's stated goal of a much larger remittance-cost reduction.
