

Tether (USDT) Share of Stablecoin Market Cap (Fig. B2)
(range 58.3-63%, late 2025-2026)

Shown as a range across independent trackers (CoinMarketCap, DeFiLlama-based aggregators) rather than a single archived figure. The GENIUS Act (enacted July 2025) establishes forward-looking reserve/redemption standards for payment stablecoin issuers but does not retroactively resolve concentration risk in Tether's existing market share. Adjacent to, but not part of, the re-intermediation argument developed in the main text.
